## 5. Materials

5.1 *Base Metal*—The base metal shall be steel of such quality and purity that, when drawn to the size of wire specified and coated with an organic polymer, the finished fencing shall be of uniform quality and have properties and characteristics as prescribed in the specification.

5.2 Wire used for the manufacture of fabric shall meet the requirements of this specification and shall be capable of being woven into fabric without the polymer coating cracking or peeling. The polymer coating shall be formulated and produced properly to conform to the requirements of this specification.

## 6. Manufacture

6.1 Class 1 polymer-coated wire shall have the polymer coating extruded onto wire that conforms to the requirements as shown in Table 3.

6.2 Class 2a polymer-coated wire shall have the polymer coating extruded and adhered to wire that is zinc-coated by the hot-dip method, zinc-coated by the electrolytic process, or aluminum-coated by the hot-dip method.

6.3 Class 2b polymer-coated wire shall have the polymer coating fused and adhered to wire that is zinc-coated by the hot-dip method, zinc-coated by the electrolytic process, or aluminum-coated by the hot-dip method. The use of a primer prior to the application of a polymer coating may be recommended by the polymer manufacturer.

NOTE 1—Under current practice, the process for producing a Class 2b PVC coating requires the use of a primer to attain chemical bonding to the substrate. In any event, the polymer manufacturer's recommendation should be followed.

6.4 Type of metallic coating on the steel wire substrate shall be the choice of the producer unless otherwise specified.

## 7. Weave

7.1 The wire shall be woven throughout in the form of approximately uniform square mesh, having parallel sides and horizontal and vertical diagonals of approximately uniform dimensions. The top and bottom of the fabric shall be knuckled or twisted as specified in Section 12.

## 8. Size of Mesh

8.1 The size of mesh shall conform to the requirements as shown in Table 1.

8.2 The permissible variation from the specified size of mesh shall be  $\pm \frac{1}{8}$  in. [3.2 mm] for all mesh sizes over 1 in. [25 mm] and  $\pm \frac{1}{16}$  in. [1.6 mm] for all mesh sizes 1 in. [25 mm] and under.

8.3 Size of mesh shall be determined by unrolling a roll of fabric on a flat surface and exerting tension in accordance with the requirements of 18.2, then measuring the minimum clear distance between the wires forming the parallel sides of the mesh.

## 9. Diamond Count

9.1 Typical diamond count for each standard height is shown in Table 2. Other diamond counts are permissible, provided that they are consistent within a lot. The purchaser has the option to specify the typical diamond count of 4.1.8.

## 10. Size of Wire

10.1 Chain-link fabric shall be fabricated from wire diameters as necessary to meet the requirements of Table 1. The diameter shall be determined as the average of two readings taken at right angles to each other on the straight portion of the parallel sides of the mesh and measured to the nearest 0.001 in. [0.03 mm].

10.2 The permissible variation from the specified diameter of the core wire over 0.105 in. [2.67 mm] shall be  $\pm 0.005$  in. [0.13 mm]. The permissible variation for the specified diameter on core wires 0.105 in. [2.67 mm] or less shall be  $\pm 0.004$  in. [0.10 mm].

## 11. Height of Fabric

11.1 Chain-link fabric, unless otherwise specified by the purchaser, shall be furnished in the standard heights shown in Table 1. Custom order fabric is available in heights to and including 240 ft. [6.56 m]. The height of the fabric shall be the

12.1 Fabric with 2-in. [50.8-mm] or 2 ½-in. [54.0-mm] mesh, in heights less than 72 in. [1829 mm], shall be knuckled at both selvages. Fabric 72 in. [1829 mm] high and over shall be knuckled at one selvage and twisted at the other. These are the standard selvages. Other selvage combinations will be supplied only if specified by the purchaser.

NOTE 2—**Caution:** Twisted selvages for fences under 72 in. [1829 mm] in height are not recommended because of consumer safety considerations.

12.2 The selvages of fabrics with meshes of less than 2 in. [50.8 mm] shall be knuckled on both edges.

## 13. Breaking Strength

13.1 Wire constituting the fabric shall meet the minimum breaking strength shown in Table 3, as determined in accordance with Test Methods and Definitions A 370.

13.2 Specimens to establish conformance to this requirement shall comprise individual pickets from a section of the fence fabric. The specimens shall be of sufficient length so as to be firmly gripped in the testing machine after straightening. Polymer coating may be removed from the sample by chemical

or mechanical means before testing. The actual gauge length (distance between jaws) of the specimen shall be limited to the undeformed length of wire between the two adjacent bends.

## 14. Weight of Zinc, Aluminum, or Zinc-5 % Aluminum-Mischmetal Alloy Coatings

14.1 The weight of zinc or aluminum coating shall conform to Table 4.

14.2 The weight of coating shall be determined on an individual piece of wire removed from the fabric. This specimen may be any length of wire over 12 in. [305 mm] and shall include both bends and straight sections, but shall not include either twists or knuckles.

14.3 The weight of zinc or zinc-5 % aluminum-mischmetal alloy coating shall be determined by the method contained in Test Method A 90/A 90M after stripping the polymer coating as outlined in Section 15.

14.4 The weight of aluminum coating shall be determined by the method contained in Test Method A 428, after stripping the polymer coating as outlined in Section 15.

## 15. Thickness of Polymer Coating

15.1 The thickness of the polymer coating shall be in accordance with Table 5.

15.2 The thickness of polymer coating shall be determined on an individual piece of wire removed from the fabric. This specimen may be any length of wire over 12 in. [305 mm] and

shall include both bends and straight sections, but shall not include either twists or knuckles.

15.3 For Class 1 and Class 2a material, mechanically strip the polymer coating from the wire and measure the minimum and maximum thickness of the polymer coating with a suitable micrometer.

15.4 For Class 2b material, strip the polymer coating by chemical or mechanical means and determine the diameter of the bare wire. Scrape the coating from one side of the wire and measure the reduced diameter with a micrometer. The thickness of coating at this point is the difference between the measurement thus obtained and the measured diameter of the bare wire. In a similar manner, determine the thickness of coating at right angles to the first determination.

15.5 When removing polymer coating by scraping, take care not to remove any of the metallic surface.

## 16. Properties of Polymer-Coated Wire

16.1 The polymer-coated wire from which the fabric is woven shall have a demonstrated ability to conform to the following requirements:

### 16.2 Adhesion Tests:

16.2.1 Class 2a must conform to the requirements of 16.2.2. Class 2b must conform to the requirements of 16.2.3.

16.2.2 Three specimens from each lot shall be tested. Measure a distance of  $\frac{3}{4}$  in. [19 mm] from the end of the specimen. With a regular hand grip wire stripper, exert maximum hand pull parallel to the axis of the wire. Attempt to remove the measured portion of the vinyl sleeve from the core wire. The lot shall be acceptable if the polymer sleeve is not capable of being removed from the core wire on all three samples.

16.2.3 Three specimens from each lot shall be tested. Make two cuts parallel to the axis of the wire through the coating, approximately  $\frac{1}{16}$  in. [1.6 mm] apart, at least  $\frac{1}{2}$  in. [12.7 mm] long. With a knife peel back a section of the coating between  $\frac{1}{8}$  in. [3.2 mm] and  $\frac{1}{4}$  in. [6.4 mm] long to produce a tab. Attempt to remove the  $\frac{1}{16}$  in. [1.6 mm] strip of coating by pulling the tab. The lot shall be acceptable if the coating breaks rather than separates from the core wire on all three specimens.

16.3 Accelerated Aging—Polymer-coated wire from which the fabric is woven shall withstand exposure for 1000 h without failure at a black panel temperature of 145°F [63°C] when tested in accordance with Practice D 1499. Type D, E, or F apparatus described in Practice G 23 or Type BH apparatus described in Practice G 26 shall be used for the test. The product shall be construed to have failed the test if:

16.3.1 The wire fails to withstand the mandrel bend test described in 16.4.

16.3.2 Shrinkage of the polymer coating is greater than  $\frac{1}{16}$  in./ft [5.2 mm/m] of wire.

16.3.3 There is a significant change in color or gloss of the polymer surface as determined by visual inspection.

## 16.4 Mandrel Bend:

16.4.1 Polymer-coated wire when subjected to a single bend at -20°F [-29°C] around a mandrel no larger than ten times the diameter of the wire shall not exhibit breaks or cracks in the polymer coating.

16.4.2 The mandrel bend test shall be performed on an individual piece of wire removed from the fabric. This specimen may be any length of wire over 12 in. [305 mm] and shall include both bends and straight sections but shall not include either twists or knuckles.

## 16.5 Color:

16.5.1 Unless otherwise stipulated by the purchaser, the color of the polymer shall be in accordance with the standard colors contained in Specification F 934: Green, Olive Green, Brown, and Black.

16.5.2 Compliance with this requirement shall be determined by comparison of specimens of the polymer-coated wire to standard flat specimens of fused film of approximately the thickness specified for the polymer coating to be applied to the wire, and measuring at least 1- $\frac{1}{2}$  by 1- $\frac{1}{2}$  in. [38 by 38 mm].

16.5.3 Standard flat specimens for the evaluation of color of Class 1 and Class 2a coatings shall be prepared by milling, calendaring, or compression molding polymer pellets, using temperatures approximating those to be used in the extrusion.

16.5.4 Standard flat specimens for the evaluation of Class 2 coatings shall be prepared by thermally fusing polymer powder onto a suitable base, using temperatures approximating those to be used in the powder coating process.

16.5.5 The color of the standard flat specimens shall be determined in accordance with Specification F 934.

## 17. Workmanship

17.1 Chain-link fence fabric shall be produced by methods recognized as good commercial practices. The polymer coating shall be without voids. The polymer-coated wire shall be woven into fabric without tears or cuts that reveal the substrate.

## 18. Standard Length of Rolls

18.1 The standard length of roll shall be 50 ft [15.24 m]  $\pm$  1 % except as otherwise agreed upon at the time of purchase.

18.2 The length of roll shall be determined by unrolling a roll of fabric on a flat surface and exerting tension by appropriate means to remove all slack. The tension applied shall not reduce the actual height of the fabric by more than  $\frac{1}{16}$  in./ft [5.2 mm/m] of height or by more than  $\frac{1}{2}$  in. [12.7 mm], whichever is less.

## 19. Field Sampling and Number of Tests

19.1 The purchaser may select at random one roll from every 50 rolls or fraction thereof for test purposes, except in no case shall fewer than two rolls be sampled.

19.2 Sample rolls thus selected shall be checked for weave (Section 7), size of mesh (Section 8), diamond count (Section 9), core wire size (Section 10), height of fabric (Section 11), selvage (Section 12), and length (Section 18).

19.3 Test specimens taken from the outside end of the sample rolls shall be tested for breaking strength (Section 13),

weight of zinc, aluminum, or zinc-5 % aluminum-mischmetal alloy coating (Section 14), and thickness of polymer coating (Section 15).

19.4 If any specimen tested fails to conform to the specified requirements, the roll represented by the specimen shall be rejected and two additional rolls shall be tested, both of which shall meet the requirements in every respect; otherwise the lot represented by the samples may be rejected.

19.5 Unless otherwise stipulated by the purchaser, tests for breaking strength (Section 13), weight of zinc, aluminum, or zinc-5 % aluminum-mischmetal alloy coating (Section 14), thickness of polymer coating (Section 15), and properties of polymer-coated wire (Section 16) made on the wire prior to weaving may be substituted for tests made on the wire from the finished fabric.

## 20. Inspection

20.1 The seller is responsible for the performance of all inspection and test requirements as specified herein. The seller may use his own or other suitable facilities for inspection and testing unless the purchaser does not approve at the time the order is placed. Purchaser has the right to make any of the inspection and tests outlined where such are deemed necessary.

## 21. Certification and Reports

21.1 Upon the request of the purchaser in the contract or order, a manufacturer's certification that the material was produced in accordance with the specification shall be furnished.

## 22. Packaging, Marking, and Loading for Shipment

22.1 Each length of fabric shall be tightly rolled and firmly tied. Each shipment of fabric shall be identified as to the class of polymer coating, the color, the size of mesh, core wire gauge, the height and length of fabric in each roll, ASTM Designation F 668, and the name or mark of the manufacturer. These requirements apply unless otherwise specified.

22.2 When specified in the contract or order, and for direct procurement by or direct shipment to the U.S. government, marking for shipment, in addition to requirements specified in the contract or order, shall be in accordance with MIL-STD-129 for U.S. military agencies and in accordance with Fed. Each Subcontract shall preserve and protect the rights of Owner in accordance with the Contract Documents with respect to the Work to be performed by the Subcontractor so that subcontracting thereof will not prejudice such rights. Contractor shall require each Subcontractor to enter into similar agreements with Sub-subcontractors. However, nothing in this paragraph shall be construed to alter the contractual relations between Contractor and its Subcontractors with respect to insurance or bonds.
- C. Contractor shall schedule, supervise, and coordinate the operations of all Subcontractors. No Subcontracting of any of the Work shall relieve Contractor from its responsibility for the performance of the Work in accordance with the Contract Documents or any other obligations of the Contract Documents.

# GENERAL CONDITIONS

- D. It is the Contractor's responsibility to pay its Subcontractors and material suppliers on a timely basis. The Owner reserves the right to withhold a portion of the Contractor's payment if the Contractor fails to make timely payments to the Subcontractors and material suppliers.
- E. The Contract Documents shall not be construed to create a contractual relationship of any kind between the Owner and any Subcontractor; or any persons other than Owner and Contractor.
- F. The Contractor shall not enter into any subcontract with any subcontractor who has been suspended or debarred from participating in contracting programs by any agency of the United States Government or by any state, territory, or municipality.

## 3.15 INDEMNIFICATION

- A. The Contractor hereby agrees to indemnify, defend, and hold harmless the Authority, its successors and assigns, director, officers, officials, employees, agents, partners and volunteers (all foregoing singly and collectively (Indemnities")) from a and against any and all claims, losses, harm costs, liabilities, damages and expenses, including, but not limited to, reasonable attorney's fees arising or resulting from the performance of the services, or the acts or omissions of the Contractor its successors, and assigns, employees, subcontractors or anyone acting on the contractor's behalf in connection with this Contract or its performance of this Contract.
- B. Provided, however, that the Contractor will not be required to indemnify, defend, or save harmless the indemnitee as provided in the preceding paragraphs of this section if the claim, suit, or action for injuries, death, or damages is caused by the sole negligence of the indemnitee. Where such claims, suites, or actions result from the concurrent negligence of (a) the indemnitee or the indemnitee's agents or employees and (b) the Contractor or the Contractor's agent or employee, the indemnity provisions provided in the proceeding paragraphs of this section shall be valid and enforceable only to the extent of the Contractor's negligence or the negligence of its agents and employees..
- C. The foregoing indemnity is specifically and expressly intended to constitute a waiver of the Contractor's immunity under Washington's Industrial Insurance act, RCW Title 51. The parties acknowledge that these provisions were specifically negotiated and agreed upon by them. If any portion of this indemnity clause is invalid or unenforceable, it shall be deemed excised and the remaining portions of the clause shall be given full force and effect.
- D. The Contractor hereby agrees to require all its Subcontractors or anyone acting under its direction or control or on its behalf in connection with or incidental to the performance of this Contract to execute an indemnity clause identical to the preceding clause, specifically naming the Owner as indemnity, and failure to do so shall constitute a material breach of this Contract by the Contractor.

## 3.16 PROHIBITION AGAINST LIENS

- A. The Contractor is prohibited from placing a lien on the Owner's property. This prohibition shall apply to all subcontractors of any tier and all materials suppliers, in accordance with RCW 35.82.190.

## 3.17 DAMAGES FOR FAILURE TO ACHIEVE TIMELY COMPLETION

- A. Liquidated Damages
  - 1. Timely performance and completion of the Work is essential to Owner and time limits stated in the Contract Documents are of the essence. The liquidated damage amounts set forth will be assessed not as a penalty, but as liquidated damages for breach of the Contract Documents. This amount is fixed and agreed upon by and between the Contractor and Owner because of the impracticability and extreme difficulty of fixing and ascertaining the actual damages the Owner would in such event sustain. This amount shall be construed as the actual amount of damages sustained by the Owner, and may be retained by the Owner and deducted from any payments to the Contractor.
  - 2. If different completion dates are specified in the contract for separate parts or stages of the work, the amount of liquidated damages shall be assessed on those parts or stages which are delayed.

# GENERAL CONDITIONS

## 3.18 WAIVER AND SEVERABILITY

- A. The failure or delay of either party to insist on performance of any provision of the Contract, or to exercise any right or remedy available under the Contract, shall not be construed as a waiver of that provision, right, or remedy in any later instance. Waiver or breach of any provision of the Contract shall not be construed to be a waiver of any other or subsequent breach and shall not be construed to be a modification of the terms of the Contract, unless the Contract is modified pursuant to the Clause entitled "Contract Modifications" herein.
- B. If any provision of the Contract is or becomes void or unenforceable by operation of law, the remaining provisions shall be valid and enforceable.

## PART 4 - PAYMENTS AND COMPLETION

When the Owner finds the Work acceptable and fully performed under the Contract Documents, and the Contractor has delivered to the Owner all warranties, permits, and operations manuals, the Owner will issue a Notice of Final Completion.
- B. Acceptance of final payment by Contractor, or any Subcontractor, shall constitute a waiver and release to Owner of all claims by Contractor, or any such Subcontractor, for an increase in the Contract Sum or the Contract Time, and for every act or omission of Owner relating to or arising out of the Work, except for those Claims made in accordance with the procedures, including the time limits, set forth in PART 7 - .

- A. Owner may, at any time and without notice to Contractor's surety, order additions, deletions, revisions, or other changes in the Work. These changes in the Work shall be incorporated into the Contract Documents through the execution of Change Orders. If any change in the Work ordered by Owner causes an increase or decrease in the Contract Sum or the Contract Time, an equitable adjustment shall be made as provided in 5.2 and 5.3.
- B. Pending agreement on the terms of the Change Order, Owner may direct Contractor to proceed immediately with the Change Order Work. Contractor shall not proceed with any change in the Work until it has obtained Owner's written approval.
- C. The Contractor agrees that any change in the Contract Amount or Contract Time provided in a Change Order is full and complete compensation to the Contractor for the change(s) to the work, deleted work, modified work, direct or indirect impact on the Contractor's schedule, and for any equitable adjustment or time extension to which the Contractor may be entitled to in the Change Order, pursuant to the Contract between the Owner and Contractor.

### 5.2 CHANGE IN THE CONTRACT SUM

The maximum rate for standby equipment shall not exceed 50% of the applicable rate.
- d. Allowance for Overhead: This allowance shall compensate Contractor for all noncraft labor, temporary construction facilities, field engineering, schedule updating, as-built drawings, home office cost, B&O taxes, office engineering, estimating costs, additional overhead because of extended time and any other cost incidental to the change in the Work. This allowance shall be strictly limited in all cases an amount not to exceed the following:
  - 1) For Contractor, for any Work actually performed by Contractor's own forces, 16% of the cost.
  - 2) For each Subcontractor (including lower tier subcontractors), for any Work actually performed by its own forces, 16% of the cost.
  - 3) For Contractor, for any Work performed by its Subcontractor(s), 6% of the amount due each Subcontractor.

- B. If the time of Contractor's performance is changed due to an act of Force Majeure, Contractor shall request for an equitable adjustment in the Contract Time in writing within 24-hours of the occurrence.

## PART 6 - CLAIMS AND DISPUTE RESOLUTION

### 6.1 CLAIMS PROCEDURE

- A. If the parties fail to reach agreement regarding any dispute arising from the Contract Documents, Contractor's only remedy shall be to file a Claim with Owner within 30 Days from Owner's final offer.

# GENERAL CONDITIONS

- B. The Claim shall be deemed to cover all changes in cost and time (including direct, indirect, impact, and consequential) to which Contractor may be entitled. It shall be fully substantiated and documented.
- C. After Contractor has submitted a fully-documented Claim, Owner shall respond, in writing, to Contractor with a decision within 30 Days from the date the Claim is received.
- D. Contractor shall proceed with performance of the Work pending final resolution of any Claim. Owner's written decision as set forth above shall be final and conclusive as to all matters set forth in the Claim.
- E. Any Claim of the Contractor against the Owner for damages, additional compensation, or additional time, shall be conclusively deemed to have been waived by the Contractor unless timely made in accordance with the requirements of this section.

## 6.2 ARBITRATION

- A. If Contractor disagrees with Owner's decision rendered in accordance with paragraph 6.1C, Contractor shall provide Owner with a written demand for arbitration. No demand for arbitration of any such Claim shall be made later than 30 Days after the date of Owner's decision on such Claim; failure to demand arbitration within said 30 Day period shall result in Owner's decision being final and binding upon Contractor and its Subcontractors.
  - 1. Notice of the demand for arbitration shall be filed with the American Arbitration Association (AAA), with a copy provided to Owner. The parties shall negotiate or mediate under the Voluntary Construction Mediation Rules of the AAA, or mutually acceptable service.
- B. All Claims arising out of the Work shall be resolved by arbitration. The judgment upon the arbitration award may be entered, or review of the award may occur, in the superior court having jurisdiction thereof. No independent legal action relating to or arising from the Work shall be maintained.

## 6.3 CLAIMS AUDITS

- A. All Claims filed against Owner shall be subject to audit at any time following the filing of the Claim. Failure of Contractor, or Subcontractors of any tier, to maintain and retain sufficient records to allow Owner to verify all or a portion of the Claim or to permit Owner access to the books and records of Contractor, or Subcontractors of any tier, shall constitute a waiver of the Claim and shall bar any recovery.
  - 1. In support of Owner audit of any Claim, Contractor shall promptly make available to Owner all records relating to the Work.

## PART 7 - TERMINATION OF THE WORK

### 7.1 TERMINATION BY OWNER FOR CAUSE

- A. Owner may, upon a written Notice to Contractor and to its surety, terminate (without prejudice to any right or remedy of Owner) the Work, or any part of it, for cause upon the occurrence of any one or more of the following events:
  - 1. Contractor fails to prosecute the Work or any portion thereof with sufficient diligence to ensure Completion of the Work within the Contract Time;

- E. If the unpaid balance of the Contract Sum exceeds the cost of finishing the Work, including compensation for A/E services and expenses made necessary thereby and any other extra costs or damages incurred by Owner in completing the Work, or as a result of Contractor's actions, such excess shall be paid to Contractor. If such costs exceed the unpaid balance, Contractor shall pay the difference to Owner. Contractor shall also be liable for liquidated damages until such reasonable time as may be required for Completion. These obligations for payment shall survive termination.
- F. Termination of the Work in accordance with this section shall not relieve Contractor or its surety of any responsibilities for Work performed.
- G. If Owner terminates Contractor for cause, and it is later determined that none of the circumstances set forth in 7.1A exist, then such termination shall be deemed a termination for convenience pursuant to 7.2.

## 7.2 TERMINATION BY OWNER FOR CONVENIENCE

- A. Owner may, upon Notice, terminate (without prejudice to any right or remedy of Owner) the Work, or any part of it, for the convenience of Owner.

- B. The Contractor, and its Subcontractors, shall maintain these records for a period of six (6) years after the date of Final Acceptance.

### 8.2 AUDITS AND INSPECTIONS

  - 2. The Contractor's objectivity in performing the Contract work may be impaired.
- B. The Contractor agrees that if after award they discover an organizational conflict of interest with respect to this Contract, they shall make an immediate and full disclosure in writing to the Contracting Officer, which shall include a description of the action, which the Contractor has taken or intends to take to eliminate or neutralize the conflict. The Owner may, however, terminate the Contract if it deems the action to be in the best interest of the Owner.
- C. In the event the Contractor was aware of an organizational conflict of interest before the award of this Contract and intentionally did not disclose the conflict to the Contracting Officer, the Owner may terminate the Contract for default.
- D. The provisions of this Clause shall be included in all subcontracts and consulting agreements wherein the work to be performed is similar to the services provided by the Contractor. The Contractor shall include in such subcontracts and consulting agreements any necessary provisions to eliminate or neutralize conflicts of interest.

## 8.4 INTERESTS OF MEMBERS OF CONGRESS

- A. No member of or delegate to the Congress of the United States of America shall be admitted to any share or part of this Contract or to any benefit to arise therefrom, but this provision shall not be construed to extend to this Contract if made with a corporation for its general benefit.
